corsica technologies

Unmetered technology services.
One predictable monthly price.

## Corsica Secure: Right-fit technology services for your organization.

While every MSP out there offers cybersecurity and IT, we also focus on nextgen solutions to future proof and grow your business. That's why we've bundled our key technology services and consulting into a single offering.
Corsica Secure also includes cloud integration and migration services (Microsoft 365, Intune, Sharepoint/OneDrive) and secure data integration services (EDI). We even optimize your cloud productivity applications to make sure you're leveraging all the tools you are paying for. Our goal is to empower your growth, reduce your costs, and protect your assets through technology – all while working with you to plan a long-term strategy.

Unmetered security, servers, workstations, and network support with Corsica Secure!

We combine operational support with strategic partnership.

- ✓ Delivered as a managed service including people, process, and technology tailored for your business needs
- ✓ Robust technology including managed security, managed servers, workstations, and managed network support
- ✓ Predictable pricing with monthly subscription (unlimited users, workstations, networking equipment, and servers)
- ✓ Guaranteed containment, eradication, and recovery following a cybersecurity incident, at no additional cost
