

Your True Technology Partner

Corsica offers a comprehensive suite of services and capabilities to help businesses seamlessly connect systems, applications, and data across their enterprise.

Core Technical Services

- **System Integration** – End-to-end integration of cloud, on-premises, and hybrid systems.
- **API Development & Management** – Design, build, and manage secure, scalable APIs.
- **Enterprise Application Integration (EAI)** – Integration of core systems like ERP, CRM, SCM, etc.
- **Data Integration & ETL** – Data pipelines, real-time synchronization, and transformation.
- **iPaaS Implementation** – Expertise in platforms like MuleSoft, Boomi, Informatica, or Workato.
- **Cloud & Hybrid Integration** – Secure and scalable integration between cloud platforms and on-prem systems.

Advisory & Strategic Services

- **Integration Strategy & Architecture** – Blueprinting a future-proof, scalable integration landscape.
- **API Strategy & Governance** – Defining lifecycle, security, and usage guidelines for APIs.
- **Digital Transformation Consulting** – Aligning integration initiatives with broader business goals.
- **System Modernization** – Phasing out legacy systems via modern integration patterns.

Our strategic experts have helped 1,000+ clients achieve their goals with technology. We work with customers to create a comprehensive package of technology, strategic planning, services, and processes that's tailored for them — **all for a single monthly fee.**

Implementation Excellence

- **Rapid Prototyping & Delivery** – Agile execution with fast turnaround.
- **Reusable Assets & Accelerators** – Pre-built connectors and templates to reduce time to value.
- **Testing & Quality Assurance** – Automated and manual testing for robust integrations.
- **DevOps & CI/CD Enablement** – Integration pipelines and deployment automation.

Security & Compliance

- **Secure Integration Design** – Encryption, tokenization, and zero-trust principles.
- **Compliance Support** – GDPR, HIPAA, SOC 2, etc., aligned integration practices.
- **Access Control & Monitoring** – Role-based access, logging, and auditing

Managed Services & Support

- **Integration Health Monitoring** – Proactive monitoring and alerting.
- **Ongoing Maintenance & Optimization** – Post-deployment support and tuning.
- **24/7 Support & SLAs** – Global support models with guaranteed response times.

Industry & Platform Expertise

- **Vertical Solutions** – Tailored integration for industries like healthcare, finance, retail, etc.
- **Platform Partnerships** – Deep partnerships with MuleSoft, Salesforce, AWS, Microsoft Azure, etc.
- **Training & Enablement** – Upskilling clients' internal teams to sustain integrations
