

Managed Microsoft Security powered by Sentinel

a Microsoft preferred solution

Engagement Highlights

Monitored and managed security, 24/7/365.

Quickly strengthen your security posture and protect against threats.

Defined deployment roadmap based on your environment and goals.

Custom-tailored security strategy.

Focus your attention on running and growing your business.

Combine our 24x7 SOC with Microsoft's SIEM to protect your business from ongoing threats.

- Use Sentinel immediately
- Scale automatically as needed
- Only pay for what you need

Invest in security, not infrastructure setup and maintenance, with the first cloud-native SIEM from a major cloud provider. Never again let a storage limit or a query limit prevent you from protecting your enterprise.

Together, we can build a proper cloud-native SIEM experience in Microsoft Azure—one that integrates with existing software and tools.

Custom solutions for your unique organization

Every organization is different. We tailor our solutions to fit your environment and goals.

Remote monitoring

If your organization doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, Corsica can perform remote monitoring and threat hunting for you.

Joint threat exploration

If your organization is interested in learning how to integrate Microsoft Sentinel into your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Offer Includes:

- Deployment of Microsoft Sentinel, Log Analytics, Logic Apps and Automation
- Configuration and testing of all applicable Microsoft Sentinel data connectors
- Entity configuration mapping for optimal Sentinel investigations
- Microsoft Sentinel data collection review and tuning, including rule templates
- Formal engineering review of dashboards and incident triggers
- 24x7 Security Operations Center monitoring and alerting

You own it.

With this offer, you retain full ownership of your environment while we manage it for you. All SIEM resources are located in your tenant. This prevents vendor lock-in and gives your organization flexibility over the long term.

Without outsourcing or subcontracting, we carry out all stages, end-to-end.

What we'll do:

Analyze your requirements and priorities for a SIEM deployment

Define scope & deploy Azure Sentinel in your production environment

Remote monitoring* and proactive threat hunting to discover attack indicators

*optional component

Build a customized play book for your organization

Continuously improve by leveraging the power of Microsoft's ever-evolving security stack

Why Corsica Technologies?

As one of just a few partners with Microsoft's Cloud Security Advanced Specialization, we take security seriously. We are honored to be recognized as a Microsoft Security Solutions Partner, with Advanced Specializations in Cloud Security and Threat Protection. We are a SOC 2 Type 2 organization.
