# Microsoft Defender for IoT Assessment

2–Month Proof of Concept

Demystify live OT/ICS data and visualize threats alongside our 24x7 SOC.

Get actionable insights to address risks and enhance security with Microsoft Sentinel. With our 2-month POC, you'll gain a working comfort level with Microsoft Defender for IoT while proactively safeguarding critical infrastructure and aligning with cybersecurity best practices for OT.

Fast facts

Duration: 60 Days

Scope: 1 Site / Up to 100 IoT Devices

Included: Hardware Sensor (yours to keep) + OT Site Licensing

Outcome: Production-ready Defender for IoT, integrated with Microsoft Sentinel and our 24x7 SOV
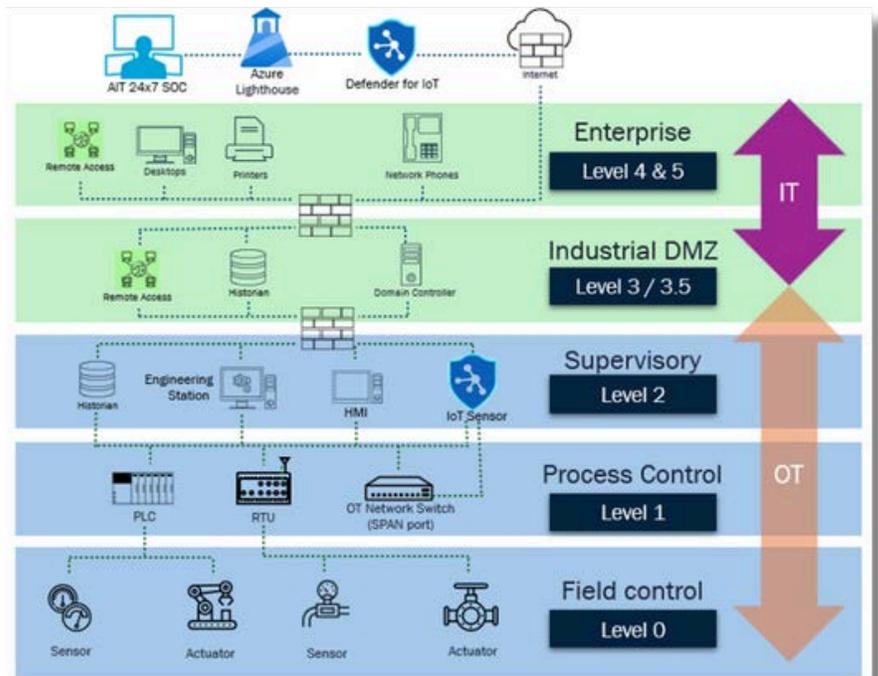

Four-Phase Engagement Roadmap

PHASE 1	PHASE 2	PHASE 3	PHASE 4
IoT Sensor Planning	**IoT Sensor Deployment**	**Defender for IoT Post-Deployment**	**OTC SOC Operations**
Gap analysis of segmentation, firewalls, and sensor placement	Install hardware sensor; onboard up to 100 devices	Validate discovery, enable detections, build dashboards & test plans	Azure Lighthouse onboarding, Sentinel integration, 24×7 monitoring & escalation

Why Corsica Technologies?

When it comes to compliance, you need an **experienced partner**. Maximize the value of your Microsoft investment in M365 and reduce dependency on 3rd party platforms. Trust Corsica to meet all your data security and compliance needs, ensuring a seamless and secure digital environment.
