

# Cybersecurity Assessment

Understand your readiness for common security threats

## Highlights

Identify a baseline of your organization's cybersecurity policies

Use Microsoft Security capabilities to generate an overview of areas of focus

Map baseline and security scan results to common threat scenarios

Develop joint plans and next steps

## Do you know where your risks lie? Most organizations don't.

Yet ransomware and data leaks present significant risks.

Over 98% of these attacks can be prevented with basic cybersecurity policies, processes, and solutions in place.

That's why we offer Cybersecurity Assessments. We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. Gain awareness of the current state of your security aligned to industry benchmarks, and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

## Why you should assess your cybersecurity

This assessment is designed to help you understand the importance of security and how to protect your organization from potential threats. We will also discuss the latest security threats and your organization can stay aware and ahead of the curve.

Through our cybersecurity assessment, you can:

1

Engage in hands-on activities to help you gain an understanding of common threat scenarios

2

Walk away with actionable next steps grounded in industry accepted benchmarks

3

Get a documented status of organizational defenses against common threats

4

Better understand how to accelerate your security journey using the latest Microsoft Security tools

## What to expect:

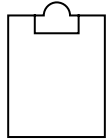

We'll partner with you to strengthen your organization's approach to cybersecurity. You'll get:

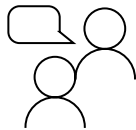

- **Insights** into common cybersecurity threats
- **Analysis** of your organization's alignment to common cybersecurity goals
- **Improvement actions** to strengthen your posture against ransomware and data leaks
- **Visibility** into to your endpoint health and Microsoft 365 data using scans from Microsoft Security tools
- **Long-term recommendations** from Microsoft security experts
