

Data Security Assessment

Understand your readiness for common security threats

Uncover & address data security risks

- ▶ **High Risk:** 46% of breaches involve customer personal identifying information or PII, compounding compliance & resolution costs.
- ▶ **Prevention First:** A data security assessment identifies vulnerabilities before they become incidents.
- ▶ **Strategic Defense:** Our assessment provides a roadmap to reduce risks, improve compliance, and prevent costly cyberattacks.

IDENTIFY RISKS

A professional excavation of your most vulnerable security risks.

SECURITY ANALYTICS

Use key insights to protect your data from cyberattacks, secure your governance protocols, and accelerate compliance.

ACTION PLAN

You'll get a roadmap to reduce risks, improve compliance, and prevent costly cyberattacks.

Our assessment process:

- **Pre-engagement Meeting:** This is where we document your objectives and data security strategy
- **Data Security Check:** Detect and discover current data security and privacy risks
- **Microsoft Purview Portfolio Overview:** Learn how to accelerate your data security & compliance journey with the right Microsoft technologies
- **Recommendations & Next Steps:** Receive actionable steps based on your organizations needs and objectives

Protect Your Data Against Generative AI

Generative AI has been released at rapid rates with little governance. Our Data Security Assessment will show you where generative AI poses a threat to your organization, and how to create the proper governance protocols to mitigate that risk.

Hardening Your Security Posture With An Integrative Approach

Your organization has more data than ever before and that data will continue to compound—and so will your security risks. However, you can harden your security posture, protect business-critical data, and reduce compliance concerns with an integrated cybersecurity approach that allows you to identify, triage, and react to data security risks rapidly. The best defense is a good offense, and the Data Security Assessment is the first step.

Long Term Action Plan With Quick Wins

After providing you with your organization's data security analysis, we will go over the key next step you need to take to immediately harden your security posture, while planning for a secure future.

Benefits of a Data Security Assessment

- ✓ **Customer-led:** We meet with you first to understand your exact security needs and objectives.
- ✓ **Deep dive:** We deliver a customized report on your current security posture.
- ✓ **Solutions:** We will suggest the right solutions to meet your security objectives and harden your security posture.
- ✓ **Top-Rated Managed Security Services Providers (MSSPs):** We pride ourselves on excellence and attention to detail, and this free assessment is no exception.
