

# Data Security Envisioning Workshop

Identify data security risks in your organizational data

## Partner-Led Workshop Highlights

Understand the risks of  
Dark Organizational Data

Learn about the risks  
organizational insiders impose

Assess your environment against  
key data protection standards

Receive an analysis and report  
on findings and associated risks

Learn about tools and services  
that can help mitigate risks

Explore recommendations  
and next steps

In today's digital age, data is the life blood of any business, and its security is paramount. As the data sphere is projected to double by 2026, the sheer volume and complexity of data will only increase, making it a prime target for security incidents. With the rapid deployment of generative AI apps, data security risks are escalating, demanding robust protection and governance.

Yet an alarming 30% of decision-makers lack visibility into their sensitive data's location or nature, leaving their digital estate vulnerable. It's time to take control and safeguard your business's future. Don't wait for a costly data breach to realize the importance of data security. Secure your data now and stay ahead in the game of digital defense.

### Intelligently investigate and take action on data security risks

Detecting, investigating, and acting on data security risks in your organization is critical to ensuring trust, creating a safe workplace and protecting company assets and employee and customer privacy.

The Data Security Envisioning Workshop gives you the insights you need to understand data security, privacy and compliance risks in your organization.

# More than 80%

of leaders cited leakage of sensitive data as their main concern around adopting Generative AI

Sources: Microsoft Data Security Index report / First Annual Generative AI Study: Business Rewards vs. Security Risks, Q3 2023, ISMG, N=400

As your business data expands and gen AI is being deployed rapidly, having an integrated approach that can help quickly identify, triage, and act on data security risks is more important than ever. Our experts will work with you to:

## Data Security Envisioning Workshop

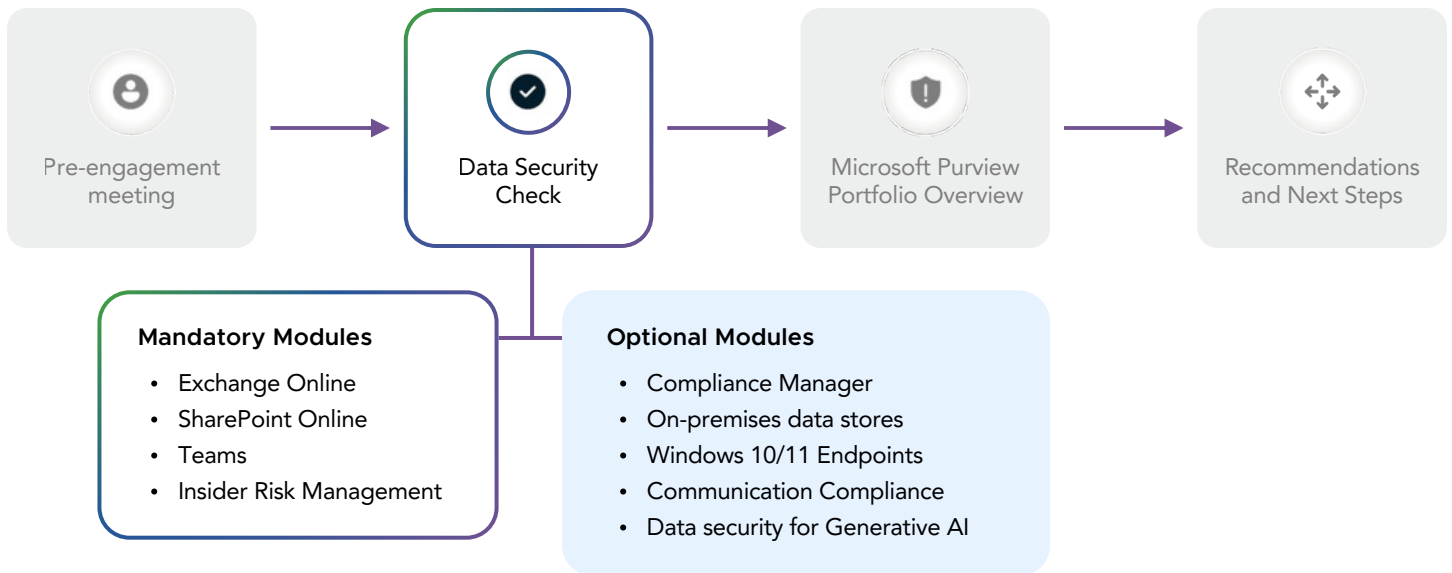

## The Data Security Check uncovers risks that might be harmful to your organization.

The Data Security Check is an integral part of the Data Security Envisioning Workshop. The Data Security Check leverages Microsoft Purview tools and services in an automated process to:

- Discover data that is stored in the Microsoft 365 Cloud and analyze it for the presence of artifacts that may impose data security risks to the organization.
- Analyze user behavior for events that impose a risk to the customers organization. These vulnerabilities range from the loss of intellectual property to workplace harassment and interaction with generative AI applications

The Data Security Check is structured around typical Microsoft 365 services and their associated data repositories that organizations use. At its core, the Data Security Check analyzes user behavior and scans data repositories related to email, collaboration, and document storage.

Optional modules can be added to extend the Data Security Check to include on-premises data repositories, Windows 10/11 endpoints, generative AI and more. All activities share a common framework that will allow you to understand the risks that exist in your organization and develop a roadmap to mitigate and protect your company's information.

## What to expect

By the end of this workshop, experts in Microsoft compliance will provide you with a:

- ✓ A Security Check report that includes findings and insights from the automated discovery process.
- ✓ A list of recommendations and actionable next steps that will help mitigate the identified risks.
- ✓ Clear look into Microsoft’s approach to data security and mitigating and controlling insider risks.
- ✓ Optional Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- ✓ Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps.

## Why Corsica?

When it comes to compliance, you need an experienced partner.

Maximize the value of your Microsoft investment in M365 and reduce dependency on 3rd party platforms. Trust Corsica to meet all your data security and compliance needs, ensuring a seamless and secure digital environment.
