

# Corsica Backup & Disaster Recovery

Enterprise resilience powered by Datto, delivered by Corsica

Downtime, ransomware, and accidental data loss are no longer edge cases — they are business realities. Corsica Technologies delivers enterprise-grade backup and disaster recovery designed to keep critical systems available, data protected, and recovery predictable.

Powered by Datto's industry-leading backup technology and fully managed by Corsica's experts, our solution provides layered protection across on-prem, cloud, and SaaS environments — without adding operational burden to your IT team.

## What Corsica Delivers

Corsica-managed backup and recovery services include:

- ✓ Automated, policy-driven backups for servers, endpoints, and SaaS platforms
- ✓ Local and offsite backups with immutable recovery points
- ✓ Granular and full-system restores for rapid recovery
- ✓ Continuous monitoring and alerting by Corsica teams
- ✓ Audit-ready reporting and compliance alignment (SOC, HIPAA, GDPR)
- ✓ Disaster recovery planning aligned to business-defined RTOs and RPOs

## Built for Modern Enterprise Environments

Corsica Backup & Disaster Recovery supports:

- Hybrid and multi-site infrastructures
- Microsoft 365 and Google Workspace SaaS data
- Mission-critical workloads including file, application, and VM data
- Organizations with regulatory, cyber insurance, and audit requirements

## Datto Technology.

### Corsica Accountability.

Datto provides the backup engine. Corsica delivers the strategy, monitoring, recovery execution, and accountability.

With Corsica, backup isn't just stored; it's tested, monitored, and ready when the business needs it.

### The Corsica Advantage:

- Enterprise-grade resilience without enterprise complexity
- Proven Datto technology, fully managed by Corsica
- Predictable recovery outcomes, not best-effort restores
